The power of a bathroom concept

Everyone to his taste. Nevertheless, the combination of elements that make up one's personal preference should always harmonize. This simple notion is the basis of the Sphinx philosophy of bathroom concepts. Sphinx systematically designs new bathroom concepts, each with its own unique character. The elements of each line are designed around a central theme and form an aesthetic whole.

Pure simplicity

Sphinx 420 embodies the philosophy of the Sphinx bathroom concept, pure and simple. A single glance is all it takes to recognise the repetitive lines of the washbasin, as well as the unique specific design of Sphinx 420. This bathroom line radiates serenity in all its simplicity. The robust washbasins form a strong focal point for the well-organised bathroom. Together with the other elements, they create a balanced whole.

Solid serenity

Straightforward serenity reigns in even the smallest room in the house. The austere design of the Sphinx 420 give the toilet a compact shape, also reflected in the handbasin, which as small as it is, radiates the same solid serenity as the larger models.
